The State of Education in Illinois in 2020

As part of its mission to, “effect excellence and equity in public education,” the Illinois Education Association (IEA) has released its second “IEA State of Education Report.”

The IEA State of Education Report is both:

- A report card detailing the public’s changing views of the job politicians, administrators, teachers and support staff who are leading Illinois’ public schools.
- An analytical assessment of the public’s priorities for improving public education in our state.

A complete, unredacted set of the topline answers is attached to this report.

About the Report

The IEA State of Education Report is based on surveys conducted in a bi-partisan manner by Normington Petts & Associates and We Ask America. As with the first State of Education Report (released in April 2019), these findings are based on a poll of 1,000 adults from across Illinois with a demographic distribution that mirrors data from the U.S. Census. Respondents answered questions from Nov. 13 to Nov. 21. The poll has a margin of error of +/- 3.1 percent with a 95 percent confidence.

About IEA

IEA is the largest educators’ organization in Illinois. As the largest union in the state, the IEA has more than 135,000 members made up of Illinois elementary and secondary teachers, higher education faculty and staff, educational support professionals, retired educators and college students preparing to become teachers.

IEA believes that every student in Illinois is entitled to a high-quality education in a high-quality public school. To that end, IEA works to attract, retain, train and support the best education professionals possible. Our advocacy efforts ensure administrators and politicians are held accountable for the decisions they make that affect education outcomes in Illinois.

For more information about IEA and the 2020 State of Education Report please contact: IEA Media Relations Director Bridget Shanahan at bridget.shanahan@ieanea.org.
Key Report Findings

- The public continues to have a pessimistic view of Illinois and the state of its public schools.
- Having high quality public schools is viewed as a top priority: above reducing crime and lowering taxes
- While there still is no consensus on how to fix schools, public school teachers and education support staff are widely viewed as the solution, and not the problem, to improving Illinois’ public schools.
- There is strong belief that teachers and education support professionals are underpaid, and this contributes to the problem of attracting and retaining high quality educators.
- The public is very supportive of creative ways to attract and retain educators.
- Teacher pensions should be paid in full, and most believe that it should be easier for teachers to receive their full pensions.

The public continues to have a pessimistic view of Illinois and the state of its public schools.

When tested in March 2019, public perception of the direction of the state was pessimistic with 26 percent saying that Illinois was generally headed in the right direction, but 62 percent saying things were off on the wrong track. Since that time, perception has improved slightly, with 29 percent now saying things in Illinois are generally headed in the right direction, but still largely pessimistic with 57 percent saying things are off on the wrong track.

Illinoisans also continue to have an uninspiring opinion about public schools. Overall, the public views the schools in their local community better than public schools statewide and even nationally. More than half (53 percent) would give their local public schools an A or B grade, for an overall average of a C+. Nationally, public schools are given a C grade, while Illinois public schools are given a C-.
Having high quality public schools is viewed as a top priority: above reducing crime and lowering taxes

Despite giving the schools relatively low marks, the public overwhelmingly rate “having high quality public schools” as a top priority. In fact, a higher percentage of Illinoisans (83 percent) rank high quality schools above reducing crime (78 percent), balancing the state budget (76 percent) and lowering taxes (68 percent). Cleaning up corruption in state government (85 percent) was the only priority that topped high quality public schools. Reforming the state’s pension system was the lowest priority tested (54 percent).

While there still is no consensus on how to fix schools, public school teachers and paraprofessionals are widely viewed as the solution, not the problem, to improving Illinois’ public schools.

Overall, there is no single universal action that stands out for fixing public schools. However, the change most mentioned by the public includes an increase in funding. Indeed, two thirds (66 percent) of Illinoisans believe public schools need more funding while just 5 percent feel funding should decrease.

Other actions receiving broad support include smaller class sizes, more resources for the classrooms and more quality teachers.

While the public lacks a consensus on how to fix public schools, there is an overwhelming belief that teachers are best equipped to determine education standards and should have the strongest voice in how Illinois public schools are run.
More than one-third (35 percent) listed teachers as best equipped to determine the education standards for children at local public schools, followed by the local school district at 27 percent, local school administrators at 14 percent and 16 percent split between those saying the state or federal government.

A total of 97 percent of respondents said it is important for teachers to have a strong voice in how schools are run, with 78 percent saying it is very important. Ninety-three percent said it is important for parents to have a strong voice, while just 26 percent said it was important for politicians to have a strong voice in how public schools in Illinois are run. Clearly, teachers and not politicians should be taking the lead on improving public education.
There is strong belief that teachers and paraprofessionals are underpaid, and this contributes to the problem of attracting and retaining high quality educators.

The number one word that comes to the public’s mind when they think about Illinois public school teachers is “underpaid,” at 16 percent. While there is strong support (65 percent total) for the recent legislation placing the minimum teacher salary at $40,000 per year, 52 percent still believe public school teachers are paid too little.

Overall, the public grades Illinois public schools at a C on attracting and retaining the best educators and 76 percent agree if Illinois paid teachers higher salaries, we would attract better quality teachers.

Additionally, a massive 81 percent say that paraprofessionals, making an average of just $10 per hour, are paid too little. The connections are plain: Better pay for teachers and paraprofessionals leads to attracting and retaining more high-quality educators and more high-quality educators are needed to improve public education.
The public is very supportive of creative ways to attract and retain educators.

While the public thinks public school teachers and paraprofessionals are underpaid and this has caused a problem with attracting and retaining high quality educators, they are open to creative solutions like student loan forgiveness.

When asked whether they would support “a program that forgives the student loans of Illinois residents who attend Illinois universities and teach in Illinois public schools for 10 years,” 69 percent of Illinoisans support this idea, with nearly half (48 percent) saying they strongly support it.

Teacher pensions should be paid in full, and most believe that it should be easier for teachers to receive their full pensions.

Because teachers do not receive Social Security, the public believes it is imperative that they be allowed to keep their full pensions. Three-quarters (75 percent) of Illinoisans say that teachers should keep their full pensions, while just 11 percent say they should see their pensions cut some and only 6 percent saying they should be eliminated.
Furthermore, the public thinks lawmakers made it too difficult for teachers to become eligible for their full pension when they changed the law on anyone hired after 2011 having to work until they were 67 years old. Sixty-two percent of the public say they support recently hired teachers only having to work until the age of 60, and not 67.
Appendix
Hello, my name is ______________ and I’m calling from ____, a national public opinion research firm. We are not trying to sell you anything or asking for a donation. We are conducting a survey in Illinois on a number of public issues and your telephone number was selected at random. Are you age 18 or older?

1. Would you say things in Illinois today are generally headed in the RIGHT DIRECTION or would you say things are off on the WRONG TRACK?

   RIGHT DIRECTION .......................................... 29%
   WRONG TRACK .............................................. 57
   (DON’T KNOW) ................................................ 14

2. Now, I am going to read you a list of priorities for Illinois. Please tell me how important each one is to you, personally, on a scale of zero to ten where a zero means not a priority at all and ten means it is your top priority. You can choose any number from zero to ten. The first one is:

<table>
<thead>
<tr>
<th>Priority</th>
<th>TOTAL</th>
<th>HIGH</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Having high quality public schools</td>
<td>59%</td>
<td>81%</td>

8. People have different ideas about what Illinois schools should be preparing kids for. I am going to read some ideas about things Illinois schools could be preparing kids for and I want you to tell me how important each one is to you, personally, on a scale of zero to ten where a zero means not a priority at all and ten means it is your top priority. You can choose any number from zero to ten.

[RANDOMIZE]
